

No-Sew Pet Bed

Original instructions can be found online at:
<http://www.instructables.com/id/No-Sew-Pet-Bed/>

*These are modified from the original.

Step 1: Materials

- 2 pieces of material (here we are using fleece), one yard each. You can change the size to make it bigger or smaller.
- Batting (pillow filling) or a pillow of some sort.

Step 2: Cut Shape

Decide what size bed you want. Remember to keep in mind that the pieces will be cut so it will be a bit smaller than it looks.

It's easiest if you cut the two layers at the same time. That way they'll be sure to line up perfectly!

First I cut the selvage edge from the fleece - it has the test printing on it.

Step 3: Cut Fringe

Next I measured 4" in from each corner and laid a ruler across this line.

I cut a slit every inch until it reached the ruler. This was much easier than drawing a bunch of lines first.

You will end up cutting out the corner pieces.

Step 4: Knot

Starting at one corner, tie the two sides together strip by strip. Use a double knot to make sure it doesn't come undone.

Tie together all of the strips, leaving an opening large enough to stuff with the batting or pillow.

Step 5: Stuff

Fill the bed with batting (or a standard sized pillow) and tie off remaining strips.

You're finished! All that's left is to introduce your pet to its new bed. Hope you both enjoy!
